

AARM 2025 Theme: Connected Skies, United Efforts

Concept Overview

- **Connected Skies:** Represents the shared airspace across the Americas, highlighting the need for seamless coordination between air navigation service providers (ANSPs), aviation authorities, and technical personnel.
- **United Efforts:** Reinforces the idea that no single country or organization can ensure aviation safety alone—collaboration is essential for progress.

Key Focus Areas

1. Cross-Border Cooperation

- Strengthening partnerships between regional air traffic management entities.
- Sharing best practices and technologies to improve airspace efficiency.

2. Technology Integration

- Adopting interoperable systems across different countries.
- Enhancing cybersecurity and automation in air traffic management.

3. Workforce Development

- Training and knowledge-sharing among aviation technical professionals.
- Encouraging standardization and certification alignment across the region.

4. Sustainability & Future Challenges

- Addressing environmental concerns through collaborative solutions.
- Preparing for emerging challenges like urban air mobility and space-based surveillance.
